

Closed Shelving is a popular and proven system which uses nut and bolt fixings with neat corner plates for rigidity. Shelves are fully adjustable every 36mm. Recommended maximum load: 100kg per shelf. Finish: Epoxy powder-coated. Can be supplied in an open clad unit (as illustrated) and closed units, utilising steel back and side cladding. Supplied pre packed with full instructions. This shelving system is ideal for office storage, factory and commercial product and smaller item storage, amongst others.
